

Voice Command Cheat Sheet

Voice Command Cheat Sheet for Treo 700w

Knowing the commands makes all the difference in Voice Command.

===== CALLING A CONTACT =====

Commands:

Call <contact>
Call <contact> at home
Call <contact> at work
Call <contact> on mobile
Call <contact> on cell
Call <contact> on cellular
Call <contact> at home two
Call <contact> at work two
Call <contact> at car
Call <contact> on radio
Call <contact> on pager
Call <contact> at assistant

To confirm that you want to make the call after Voice Command responds:

You can say "Yes" or "Correct" to call.
You can say "No" or "Incorrect" to try again.

If Voice Command asks you which location, you can:

Repeat one of the locations that Voice Command offers to call.
Say "No" to try again.

Related commands:

You can say "Call back" to call back the last call that you received.
You can say "Redial" to call back the last call that you made.

Examples:

Call Karen Archer on cell
Call Frank Miller
Call City Light and Power
Call Karen Archer Home

Notes:

Voice Command indexes by the Contact's first and last name if it exists. If you have a nickname entered, you can use that

too. Voice Command will only let you call by company name if there is no first or last name.

You must prefix contact calling with the "call" keyword. If you use "dial", it won't work!

===== DIALING A NUMBER =====

Commands:

Dial <7-digit number>
Dial <10-digit number>
Dial <1+10-digits>
Dial <N - 1 - 1>

Examples:

Dial 555-0200
Dial 800-555-1212
Dial 1-800-555-1212
Dial 411

You must prefix digit dialing with the "dial" keyword. If you use "call", it won't work!

===== CHECKING CALENDAR =====

Commands:

What are my appointments today?
What are my appointments tomorrow?
What's my next appointment?

===== START MENU =====

Commands:

Start <program>

Example:

Start Solitaire
Start Messaging
Start Internet Explorer
Start Pictures and Video

Notes:

Voice Command will index any file that is in or inside of \windows\program files
You have to say the file name exactly as it is written. It may be helpful to rename shortcuts.
Also, you can put links to web pages here and go straight to a saved web page this way.

===== MEDIA =====

Commands:

Play music
Play media
Play artist
Play album
Play genre
Play <artist>
Play <album>
Play <genre>
Play everything
Play
Pause
Stop
Next
Previous (track)
Shuffle on
Shuffle off
What song is this?
What track is this?

Examples:

Play The Beatles
Play The White Album
Play Rock
Play Everything

Notes:

You cannot play individual tracks using voice
Voice Command will index the media based on the metadata. You can use a metadata editor to groom the fields.

===== CHECKING STATUS =====

Commands:

What calls have I missed?
Flight mode on
Flight mode off
Set ringer high
Set ringer low
Set ringer medium
Set ringer mute
Set ringer vibrate
What is the date?
What is the time?
What is my battery level?
What is my signal strength?
